If you want to look for more higher brightness 10mm type leds, These LEDs(10mm 0.5W white leds) will blow you away! They are 20-30 Times brighter than our 5mm/8mm LEDs! Using the latest technology they consume 0.5 Watts of power and give light output comparable to a 4-8 watt light bulb!

Production process for lamp leds

The size refers to the outside diameter of the LED, with 5mm being the most common LED model. 3mm LEDs are the smallest and used in tight-fitting applications. 8mm and 10mm models are used to output as much light as possible.
